

## THE SMARTER ALTERNATIVE FOR THE FURNITURE INDUSTRY

West Fraser industrial-grade furniture frame panels are engineered for use in upholstered and motion furniture. West Fraser panels allow you to decrease the cost of raw materials for furniture manufacturing without sacrificing product quality.

- Available in 3 grades (FN, HD and HD Plus) to meet different application requirements
- Have no knots, core voids or delamination
- Reduce your costs
- Are unmarked with no edge seal, grade stamps or marketing stamps
- CARB (California Air Resource Board) exempt

# FURNITURE

ENGINEERED STRAND PRODUCTS **ESP**

**Performance** – Our furniture frame grade panels are a cost effective high performance alternative to plywood.

**Manufactured and Engineered for Strength**

– West Fraser’s panels are manufactured using layers of wood strands aligned in alternating directions and then bonded together with heat and pressure. The resulting panel is smooth, strong and uniform.

**CARB Exempt** – Exempt from U.S. HUD and California Air Resource Board (CARB).

**Uninterrupted Supply** – West Fraser has manufacturing facilities throughout the U.S. and Canada, ensuring that we will meet your production needs.

**Defect Free and Dimensionally Stable**

– Our furniture frame panels have no core voids or knot holes, allowing you to use the entire panel with virtually no waste. Panels lay flatter than alternatives, with no warping or cupping.
