

# PRECISION ENGINEERED WOOD PANEL FOR TODAY'S ENCLOSED TRAILER FLOOR SYSTEMS

## BUILD BETTER TRAILERS

StableDeck and StableDeck+ afford the thickness tolerance required of components in the most precise applications.

StableDeck+ is manufactured with additional resins and wood to deliver extra strength and rigidity where needed.

- Excellent resistance to twisting, cupping, cracking and warping
- Strong fastener holding
- Excellent anti-swell properties

- 1-year limited warranty
- Smooth sanded finish on the face of the panel with no panel markings
- No knotholes or core voids, and withstands higher impacts than plywood alternatives
- Meets or exceeds APA PS2 standards
- CARB (California Air Resource Board) exempt - free of any urea-formaldehyde resins
- Superior yield due to optimized panel sizes
- Clean surfaces, free of patches, putty and other imperfections
- Comes standard as a 4x8 panel, nominal 23/32 thickness. Other panel lengths are available – contact us for more details.
