

PRECISION ENGINEERED WOOD PANEL FOR TODAY'S ENCLOSED TRAILER WALL SYSTEMS

STRONG OR STRONGER

Offering multiple advantages to the transportation cargo manufacturing industry customers who are in search of consistency, quality and overall appearance.

StableWall and StableWall+ are sanded to brighten the panel face which provides a surface that is consistent in color and more visually appealing than alternative panels.

- Excellent yield due to optimized panel sizes
- 1-year limited warranty
- Meets or exceeds APA PS2 standards
- High internal bond that easily accepts and holds nails, screws and staples
- Outstanding anti-swell properties
- Resistance to twisting, cupping, cracking and warping
- Clean surfaces free of patches, putty and other imperfections
- Smooth sanded finish on the face of the panel with no panel markings
- Steam pre-heating technology acclimatizes the panel for improved core strength & stability
- CARB (California Air Resource Board) - exempt and contains no urea-formaldehyde resins
