

TruFlor[®]

pointSIX[®] EDGE TECHNOLOGY

The Start of a Great Build

TruFlor pointSIX T&G Sub-Flooring with Patented Tapered Edge Technology

TruFlor pointSIX[®] is a commodity T&G sub-floor that offers value, strength and durability on the job site. Manufactured with a 0.6mm taper on the panel edges to offset edge swell, TruFlor pointSIX consistently delivers the quality and performance builders need at a price point that represents value.

Build Better!

Reduce Costs!

Grow Profits!

- Engineered with our patented pointSIX taper on the 4-foot and 8-foot edges to offset edge swell
- Provides quality and performance to reduce costs and cycle times
- Comes with a 25-year limited warranty
- No added urea-formaldehyde resins and CARB exempt
- TruFlor pointSIX panels are engineered for sub-floor applications and are available in a variety of different thicknesses
- TruFlor pointSIX meets or exceeds PS 2 standards and is approved in all North America building codes
- Able to withstand construction delays without structural properties being affected
- Every TruFlor pointSIX panel has a face stamp and has turquoise edge seal for easy identification

If it doesn't say TruFlor pointSIX on the panel – it isn't.

Build Better With Renewable Wood Products

West Fraser is a diversified wood products company with more than 50 production facilities in Canada, the United States, the United Kingdom, and Europe. From responsibly sourced and sustainably managed forest resources, the Company produces lumber, engineered wood (OSB, LVL, MDF, plywood, particleboard), and other products including pulp. West Fraser's products are used in home construction, repair and remodelling and industrial applications. We are committed to helping builders, build better, faster and with greater efficiency.
